

Hayward at Salon Piscine

Salon Piscine, the global international pool fair, was held in Lyon, France in November 2016, where both Kripsol and Hayward presented their newest equipment ranges on separate company stands.

On the Hayward stand, Hayward showed a new offering of Hayward branded commercial filters being made available through manufacturing resources gained by the Kripsol acquisition in August of this year. Look for new product announcement in the commercial category for 2017 soon to be made available to Hayward customers around the globe.

Robert De Martini, General Manager of IMG and Carlos Hagen, Export Manager of Kripsol have both managed groups that have served the international pool market place for many years and look forward to serving their separate customers under their respective Kripsol and Hayward brands.

"I was so pleased to get to know Carlos and his export team during the Lyon fair. Kripsol has been a respected competitor for years and I was glad to see our similar approaches to serving the needs of our customers" commented De Martini.

Carlos Hagen & Robert De Martini

Kripsol will continue to serve its customer base separately from Hayward's activities and Hayward will incorporate Kripsol's manufacturing capability to bring new Hayward branded products to Hayward's customers world-wide.

Sneak Peek! Hayward Commercial Filter

At Salon Piscine in Lyon, France Hayward was pleased to introduce a new bobbin-wound filter manufactured of a polyester shell reinforced with resin impregnated fiberglass. The filter is equipped with an internal lateral system and will be made available in sizes 1050mm to 1400mm diameter.

The standard maximum working pressure is 2.5kg/cm² with a testing pressure to 3.75kg/cm² with a water temperature limit of 40°C. The filter is mounted on a separate mounting base.

Many filter options will be available to meet any demanding project specification.

Product availability will be 2Q 2017 and further details will be available at the beginning of the year.

Low Voltage Transformer Now Available for 120 Volt Installations

Recently added to the ProHayward Low Voltage Transformer line-up is a Hayward 120V version with multi-tap choices for proper low voltage electrical supply to underwater lights and even outdoor low-voltage lighting.

The 120V transformer is fitted with a convenient on/off power switch as well as an electrical cord for installation ease.

The transformer compliments the popular ProHayward line of 220V transformers which have become the transformer of choice of pool professionals around the world.

Contact Hayward/IMG Customer Service staff for further details on the newly introduced Hayward low voltage transformer.

Model 3700 Value Light for a Creative Solution to Tight Budgets

The 3700 Value Light is a good choice for fountains, steps and benches where a pool sized light is not practical.

The 50W/12V halogen light has an optimized reflector assuring good lighting performance in a smaller fixture. The lamp is also field substitutable to an MR16 type LED white lamp locally available if the project specifies an LED light source.

The 3700 is complete with niche and light removal tool. The light is ideal for tight budgets when a feature light is still specified.

Liquid Feed System With Easy-Fill Design

Hayward introduced an innovative Liquid Feed System that offers a reliable and durable solution for automatic acid and liquid chlorine dispensing.

This system consists of a 15 gallon (56.7L) capacity UV resistant tank and low-power fixed output dosing pump. The tank cap is color coded and the tank is labeled as acid or chlorine for added safety.

Hayward makes liquid refill easier than ever employing an upright, convenient design with built-in handles and a spill containment barrier.
