

Hayward Tandem Systems are the Sensible Solution for Semi-Commercial Installations

Tandem installations allow for easier filtration system placement in tight equipment rooms. They also allow for the servicing of individual components without taking the total filtration system off-line.

Tandem of 4 each S360T2

Public pool operators benefit because Hayward tandem systems offer a lower installed cost compared to traditional single pump/filter commercial systems.

Hayward tandem configurations are specified in the Hayward Tandem Guide which can be downloaded from <http://haywardimg.pomona.poolproducts.com>

Goldline Offers the Best Solar Experience Automatically

Hayward's GL-235 monitors the differential temperature between the pool water and the solar panels. With the system's accurate calibration the pool water temperature is easy to adjust for precise temperature control. Automatic nighttime cooling is also available for pools that overheat in hot climates.

The advanced technology available with the GL-235 system controls a single solar valve that automatically diverts water through the pool's collector panels.

Hayward's Goldline solar control is an important part of the Totally Hayward™ system of advanced pool equipment.

Combine the GL235 with Hayward's 2 and 3 way valves for optimum performance.

New Hayward Pool Products Pricing Announced Effective October 1, 2017

Hayward Pool Products announced higher pricing effective October 1, 2017.

The price increase on average is 2.2% and is in line with increases in the United States and globally announced by other industry manufacturers.

Order before October 1, 2017 to assure receiving your Hayward and other U.S. equipment requirements at the lowest possible prices.

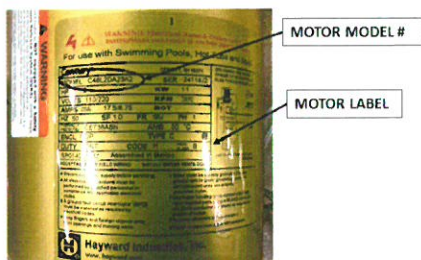

From all of us at Hayward IMG, we thank you for your support and wish you continued success throughout the remainder of the year.

TECH NOTE...

PUMP SERIAL NUMBERS EXPLAINED

Providing the right serial number is important to expedite warranty claims and track any manufacturing issues.

Customers often *wrongly* provide the serial number from the label on the pump motor. This is related specifically to the motor and not the pump as a whole.

The serial number that Hayward primarily requires is on the black and silver label that is affixed to the wet-end part of the pump.

The same product ID information is also located on the outside of the box.

Hayward/IMG Offers Spare Parts for A.O. Smith Motors

Hayward/IMG carries frequently asked for spare parts for A.O. Smith motors used with Hayward pumps.

Fans, switches and capacitors are available for performing technical service on A.O. Smith motors. In addition, motor case parts and spray paint color match is available to freshen up the appearance of the motor after service.

For availability of Hayward motor parts, it is best to send a digital photo of the parts required due to part changes over the years.

Our Customer Service Department will assist you with the correct motor parts you need.

For more information on the products featured in Newsplash, please contact Hayward/IMG at fax: 909.444.0327, email: img@hayward.com or go to www.Haywardpool.com
