

### WE'RE IN THIS TOGETHER.

As COVID-19 continues to impact our communities, we're committed to doing what's best for our customers, our employees and the public. We take very seriously our responsibility to help care for and protect the communities we serve.

It's important to share some of the steps Hayward is taking to keep things running as normal as possible so you can continue to run your business. As we gain new facts we're acting quickly to comply.

To date, we are practicing social distancing, limiting customer visits, canceling trade shows, avoiding gatherings with 10 or more people and encouraging the use of online meeting software in place of team meetings.

Our manufacturing and supply chain continues intact and we are not projecting any significant loss of productivity to date. We have forward staged plenty of inventory into our distribution centers. Our organization will continue to provide our services to you, virtually or directly, as needed.

There is nothing more important than our collective health and safety. Please take care of yourselves, your loved ones, and others who may need help.

Ray Denkwicz  
Managing Director

## Hayward CAT 6000 – The most advanced swimming pool water chemistry controller

The Hayward CAT 6000 features an intuitive interface, innovative solid-state free chlorine sensor and the most precise sanitizer control available.

CAT 6000 guides you through programming. Innovative sensing technology utilizes a unique feature named "Dynamic Sanitizer Control", allowing for more precise sanitization control than ever before.

The CAT 6000 uses innovative solid-state sensing technology for its low-maintenance true free chlorine, temperature, and conductivity sensors.

NSF/ANSI Standard 50  
Certified.

Versatile control options including 4-20mA programmable inputs, flow and level sensing inputs, programmable powered output and dedicated pH and sanitizer outputs.

Built-in Wi-Fi connectivity allows access via the Poolcomm website. Bluetooth capability allows the system to communicate with peripherals.

The Clear O3 water purifying system from Paramount creates ozone using a proprietary UV bulb specially designed to excite ozone molecules from the oxygen in the air.

The ozone enriched air is mixed with the water going into the pool circulation pump. A proprietary -flow meter establishes the ideal -flow of air for efficient ozone production.

The extruded aluminum main body has fiber-filled resin end caps and is engineered to survive in the pool equipment environment.

Radiant heat ribs dissipate heat to maintain ozone output at peak operating temperatures and the side panel is removable, making maintenance and bulb replacement easy.

Single unit works effectively on pools up to 55,000 gallons.

Paramount is a Hayward Company.

## Hayward TigerShark® Robotic Cleaner

Renowned for many years for its solidity and efficiency, the Hayward TigerShark® cleans the bottom, walls and waterline.

With its ASCL microprocessor (Adaptive Seek Control Logic), it calculates the shape and size of your pool to clean every spot efficiently.

The Hayward TigerShark® is fully automatic, with no need for an exterior bag or pipe.

Available in the Quick Clean (QC) version for full cleaning in under 2 hours and with optional foam-brush for pools with tile finish.

Caddy Cart  
RC99385

An optional caddy cart makes handling easier.

## Pool water testing made easy with your smartphone.

Launching in April, the easy to use app allows quick and accurate measurements and provides historical results of 5 important water quality parameters: pH, Chlorine, Total Alkalinity, Total Hardness and Cyanuric Acid.

The app will recommend chemical dosages for perfect water balance based on pool size.

- Instant** pool water readings
- Accurate** results instantly
- Gives exact chemical **dosing**
- Automatic **reminders**
- Receive equipment and in store **coupons**

Dip the strip in the water and align in app window for fast accurate results every time.

The test strips are assembled in a convenient specially designed point of sale display carton of 12 bottles with 50 strips per bottle.

Contact your local Hayward distributor to get a free trial size bottle.
